PROFESSIONAL PROFILE

Web developer with over 700 hours of theoretical-practical academic experience in front-end and back-end technologies, including Javascript, React and Node. I participated in an academic group project where I learned to work effectively as a team and to solve problems effectively. I focus on providing scalable and user-friendly solutions, and look for opportunities to apply my skills in web application development and contribute to the company's growth.

EXPERIENCE

Full Stack Web Developer (Academic), Henry - Trainning contract
Remote

Dec 2022 - Jan 2023

- Participation in the design and development of a complete application on Animes as part of an agile development team of 4 developers.
- Responsible for the design of the application using Figma and the development of features such as registration, detail, filtering, user panel and subscription by plan.
- Work with the team to ensure proper integration and a smooth user experience.
- Improve desktop application performance by 36%, reducing charging time from 20s to 13s on 3g slow network.
- Collaborate on error and load management in the detail and home sections.
- Learn and implement new technologies such as Typescript, payment gateway with Paypal API, password encryption with bcrypt and third-party login with Auth0.

PROJECTS

Soflink - Project management app (https://soflink.vercel.app/)

Aug 2023 - Oct 2023

Collaborative (in real time) application for project management. Organize, add, assign and eliminate project tasks.
Techs: Typescript, React, Node, Express, Mongodb, Prisma, Graphql, Apollo, Websocket, HTML, TailwindCSS, Auth0.

Zero Two - Anime page (https://zerotwo-deploy.vercel.app/)

Nov 2022 - Dec 2022

Web application that uses manipulates and manages Animes data brought from an external api (KitsuAPI). The application allows the user to view lists of anime, search and see the detail of the anime as its episodes. The user can interact by creating an account through either Google, which allows you to create lists and add favorites, as well as comment and manage your profile data or as your subscriptions.
Technologies used: Typescript, Javascript, React, Node, Express, Sequelize, Redux, HTML, CSS, Auth0, Paypal Developer API, Kitsu API.
